```
Question 3:

Su-

vboxuser@1234:~$ su -

Password:

root@1234:~#

Question 4:

apt-get upgrade
```

root@1234:~# apt-get upgrade
Reading package lists... Done
Building dependency tree... Done
Reading state information... Done
Calculating upgrade... Done
0 upgraded, 0 newly installed, 0 to remove and 0 not upgraded.

#### Question 5:

## sudo apt-get install apache2

```
root@1234:~# sudo apt-get install apache2
Reading package lists... Done
Building dependency tree... Done
Reading state information... Done
The following additional packages will be installed:
   apache2-data apache2-utils
Suggested packages:
   apache2-doc apache2-suexec-pristine | apache2-suexec-custom
```

## sudo apt-get install mariadb-server

```
root@1234:~# sudo apt-get install mariadb-server
Reading package lists... Done
Building dependency tree... Done
Reading state information... Done
The following additional packages will be installed:
   galera-4 gawk libaiol libcgi-fast-perl libcgi-pm-perl
   libconfig-inifiles-perl libdbd-mariadb-perl libdbi-perl libfcgi-bin
   libfcgi-perl libfcgi0ldbl libhtml-template-perl libmariadb3 libsigsegv2
   libterm-readkey-perl mariadb-client-10.5 mariadb-client-core-10.5
   mariadb-common mariadb-server-10.5 mariadb-server-core-10.5 mysql-common
   rsync socat
Suggested packages:
```

sudo mysql\_secure\_installation

```
root@1234:~# sudo mysql secure installation
```

NOTE: RUNNING ALL PARTS OF THIS SCRIPT IS RECOMMENDED FOR ALL MariaDB SERVERS IN PRODUCTION USE! PLEASE READ EACH STEP CAREFULLY!

In order to log into MariaDB to secure it, we'll need the current password for the root user. If you've just installed MariaDB, and haven't set the root password yet, you should just press enter here.

#### sudo apt-get install php libapache2-mod-php php-mysql

```
root@1234:~# sudo apt-get install php libapache2-mod-php php-mysql
Reading package lists... Done
Building dependency tree... Done
Reading state information... Done
The following additional packages will be installed:
    libapache2-mod-php7.4 php-common php7.4 php7.4-cli php7.4-common php7.4-json
    php7.4-mysql php7.4-opcache php7.4-readline
Suggested packages:
    php-pear
The following NEW packages will be installed:
    libapache2-mod-php libapache2-mod-php7.4 php php-common php-mysql php7.4
    php7.4-cli php7.4-common php7.4-json php7.4-mysql php7.4-opcache
    php7.4-readline
0 upgraded, 12 newly installed, 0 to remove and 0 not upgraded.
Need to get 4,263 kB of archives.
```

## sudo systemctl enable apache2

```
root@1234:~# sudo systemctl enable apache2
Synchronizing state of apache2.service with SysV service script with /lib/system
d/systemd-sysv-install.
Executing: /lib/systemd/systemd-sysv-install enable apache2
```

## sudo systemctl enable mariadb

```
root@1234:~# sudo systemctl enable mariadb
Synchronizing state of mariadb.service with SysV service script with /lib/system
d/systemd-sysv-install.
Executing: /lib/systemd/systemd-sysv-install enable mariadb
```

#### Question 6:

apt install perl php-ldap php-imap php-apcu php-xmlrpc php-cas php-mysqli php-mbstring php-curl php-gd php-simplexml php-xml php-intl php-zip php-bz2 -y

```
root@1234:~# apt install perl php-ldap php-imap php-apcu php-xmlrpc php-cas php-mysqli php-mbstring php-curl php-gd php-simplexml php-xml php-intl php-zip php-b z2 -y
Reading package lists... Done
Building dependency tree... Done
Reading state information... Done
Note, selecting 'php7.4-mysql' instead of 'php-mysqli'
Note, selecting 'php7.4-xml' instead of 'php-simplexml'
perl is already the newest version (5.32.1-4+deb11u2).
php7.4-mysql is already the newest version (7.4.33-1+deb11u1).
php7.4-mysql set to manually installed.
The following additional packages will be installed:
   libc-client2007e libonig5 libxmlrpc-epi0 libzip4 mlock php-apcu-bc
```

#### Question 7

# sudo systemctl restart apache2

```
root@1234:~# sudo systemctl restart apache2
root@1234:~#
```

#### **Question 8**

Question 9
chown -R www-data /var/www/html/glpi/
root@1234:~# chown -R www-data /var/www/html/glpi/
root@1234:~#
sudo chmod -R 755 /var/www/html/glpi/
root@1234:~# chmod -R 755 /var/www/html/glpi/
Question 10
Mysql -u root
root@1234:~# mysql -u root
Welcome to the MariaDB monitor. Commands end with ; or \q.
Your MariaDB connection id is 30
Server version: 10.5.18-MariaDB-0+deb11u1 Debian 11
Copyright (c) 2000, 2018, Oracle, MariaDB Corporation Ab and others.
Type 'help;' or '\h' for help. Type '\c' to clear the current input statement.
MariaDB [(none)]>
CREATE DATABASE ma_base;
```

```
MariaDB [(none)]> CREATE DATABASE ma_base;
Query OK, 1 row affected (0.000 sec)
```

CREATE USER 'glpiuser'@'localhost' IDENTIFIED BY 'password';

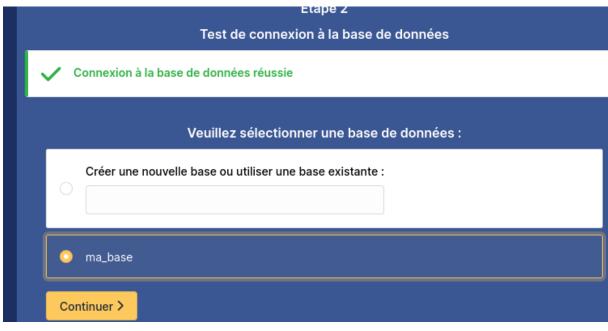

```
MariaDB [(none)]> CREATE USER 'userglpi'@'localhost' IDENTIFIED BY 'password';
Query OK, 0 rows affected (0.002 sec)
```

# GRANT ALL PRIVILEGES ON \* . \* TO 'userglpi'@'localhost';

```
MariaDB [(none)]> GRANT ALL PRIVILEGES ON *.* TO 'userglpi'@'localhost';
Query OK, 0 rows affected (0.001 sec)
```

#### Question 11

## **GLPI SETUP**

## Étape 4

#### Récolter des données

Envoyer "statistiques d'usage"

Nous avons besoin de vous pour améliorer GLPI et son écosystème de plugins!

Depuis GLPI 9.2, nous avons introduit une nouvelle fonctionnalité de statistiques appelée "Télémétrie", qui envoie anonymement, avec votre permission, des données à notre site de télémétrie.

Une fois envoyées, les statistiques d'usage sont agrégées et rendues disponibles à une large audience de développeurs GLPI.

Dites-nous comment vous utilisez GLPI pour que nous améliorons GLPI et ses plugins!

Voir ce qui serait envoyé...

## **GLPI SETUP**

## Étape 5

## Une dernière chose avant de démarrer

Vous souhaitez obtenir de l'aide pour intégrer GLPI dans votre SI, faire corriger un bug ou bénéficier de règles ou dictionnaires préconfigurés ?

Nous mettons à votre disposition l'espace https://services.glpi-network.com.

GLPI-Network est un service commercial qui comprend une souscription au support niveau 3, garantissant la correction des bugs rencontrés avec un engagement de délai.

Sur ce même espace, vous pourrez **contacter un partenaire officiel** pour vous aider dans votre intégration de GLPI.
